IDEA OF APPROCH

SHOP

user's real time location is been identified by GPS system

USER

PROMOTIONS ⟷ SCAN QR

ALL PROMOTION CURRENTLY OFFERED BY SHOP WILL SEEN IN IT

USER CAN GET BETTER DEALS ON PRODUCT AND

ENTER PRODUCT NAME

qr code is scanned for exact aslie location in the retail shop
user can even know there current location by scanning nearest qr code while following the map

Database

Server

FOLLOW MAP

Our android is connected with all REST APIs on server,

request genrated by server to database in sql queries

EXIT

AR technology will create a map that show a real time map

so that everyone can just open their camera and experience a great UX a gamified way to follow path
